

Multiplication Four in a Row Game 1

72	64	30	28	2
7	35	81	54	30
80	27	1	40	56
18	45	36	63	6
6	90	16	4	10

RULES

You will need a 1-10 die and counters in two colours.

Each player rolls the die twice and multiplies the two numbers together. If the result is on the board they can cover that square with one of their counters.

The winner is the first person to get four of their counters in a row vertically, horizontally or diagonally.

Multiplication Four in a Row Game 2

54	2	72	81	36
12	50	18	25	28
32	27	49	14	60
70	9	16	80	6
15	40	12	42	48

RULES

You will need a 1-10 die and counters in two colours.

Each player rolls the die twice and multiplies the two numbers together. If the result is on the board they can cover that square with one of their counters.

The winner is the first person to get four of their counters in a row vertically, horizontally or diagonally.

Multiplication Four in a Row Game 3

48	64	35	45	10
8	20	72	48	36
42	9	81	56	20
16	4	30	63	5
10	21	49	16	24

RULES

You will need a 1-10 die and counters in two colours.

Each player rolls the die twice and multiplies the two numbers together. If the result is on the board they can cover that square with one of their counters.

The winner is the first person to get four of their counters in a row vertically, horizontally or diagonally.

Multiplication Four in a Row Game 4

27	48	30	24	2
7	35	15	54	32
80	27	10	4	56
18	40	36	63	8
6	90	16	4	30

RULES

You will need a 1-10 die and counters in two colours.

Each player rolls the die twice and multiplies the two numbers together. If the result is on the board they can cover that square with one of their counters.

The winner is the first person to get four of their counters in a row vertically, horizontally or diagonally.

Multiplication Four in a Row Game 5

21	45	32	54	3
9	36	14	56	12
48	72	20	6	50
16	42	60	64	7
25	100	10	5	30

RULES

You will need a 1-10 die and counters in two colours.

Each player rolls the die twice and multiplies the two numbers together. If the result is on the board they can cover that square with one of their counters.

The winner is the first person to get four of their counters in a row vertically, horizontally or diagonally.

Multiplication Four in a Row Game 6

28	49	35	54	2
5	30	18	50	14
81	72	70	63	50
15	48	60	90	7
45	100	12	35	32

RULES

You will need a 1-10 die and counters in two colours.

Each player rolls the die twice and multiplies the two numbers together. If the result is on the board they can cover that square with one of their counters.

The winner is the first person to get four of their counters in a row vertically, horizontally or diagonally.

Multiplication Four in a Row Game 7

8	40	25	14	24
15	40	16	54	21
32	21	10	36	40
45	28	63	9	72
48	10	24	35	32

RULES

You will need a 1-10 die and counters in two colours.

Each player rolls the die twice and multiplies the two numbers together. If the result is on the board they can cover that square with one of their counters.

The winner is the first person to get four of their counters in a row vertically, horizontally or diagonally.

Multiplication Four in a Row Game 8

28	4	35	54	20
15	45	12	14	21
32	24	10	36	48
